

PFI - SOLIDARY WHEELCHAIR

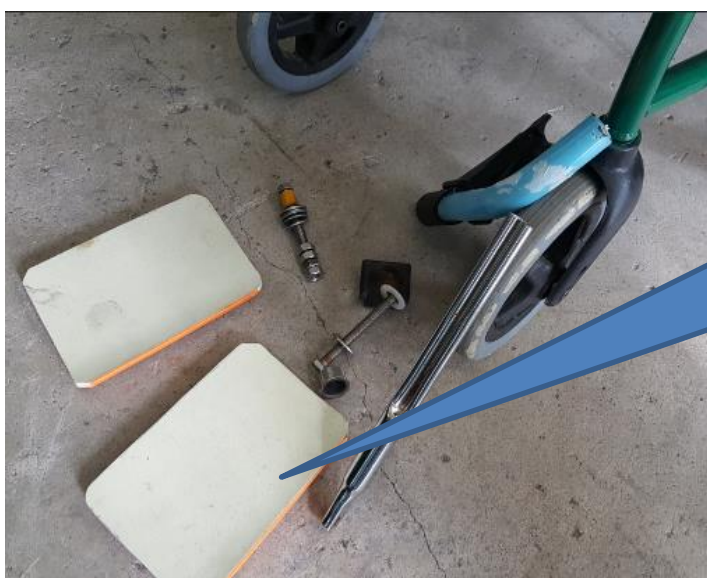

The team composed by the ambassador and 6 students of PFI in welding decided to construct a wheelchair with recycled pieces of iron and bike wheels and other materials of an old wheelchair that was dumped in the trash. This idea was brought out because they knew a girl of the neighbourhood that needs a new one and she can't afford it, so they decided to recycle and rebuild this one.

The first steps

Once the iron and all the pieces were collected they began to work on it.

Welding the pieces

The feet plate

Recycled cloth
clothes to
upholster the chair

Painting the
iron

Last step the solidary wheelchair

Solidarity with the neighbors of the territory
and the youngsters work!
